

At this very moment, our country is at the brink of committing an unparalleled atrocity.

Without explicit provocation we are about to invade Iraq.

Pundits differ about details, but all agree that if we attack Iraq, the first step will be a prolonged and extensive aerial bombardment of Baghdad, a densely populated city of 4.5 million people.

Our government needs or wants nothing from us but our silence.

If we give them that, this atrocity WILL occur. It is up to us, individually and collectively to speak up and say to our government STOP! STOP! Take no innocent lives in my name!

It is up to us, however reluctant, to speak out.

Speak out to our friends, our acquaintances, our business associates, and to ask them to speak out to prevent this war. If we fail to act, we will all have the innocent blood of the Iraqi people on our hands.

Think about this:

Some recently-leaked military plans for invading Iraq would rely on a relatively small contingent of U.S. ground troops with heavy reliance on air strikes, and would focus first and primarily on Baghdad. The Iraqi capital is described as being ringed with Saddam Hussein's crack troops and studded with anti-aircraft batteries. What is never mentioned is the inconvenient fact that Baghdad is also a crowded city also filled with somewhere between four- and five-million human beings—grandmothers, children, families, schools, hospitals, old people... A heavy air bombardment of Baghdad would cause the equivalent human catastrophe of heavy air bombardment of Los Angeles, San Francisco, Chicago, or New York. **Think about it.**

Now do something.

(Turn this over to take action.)

Commit to make at least one call or e-mail within 24 hours.

Bush & Cheney:	(202) 456-1111 president@whitehouse.gov vice.president@whitehouse.gov
Senate:	(202) 224-3121 www.senate.gov
House:	(202) 224-3121 www.house.gov

Tell them:

- ◆ You do **NOT** want the U.S. to invade Iraq.
- ◆ The goal is **disarmament**, NOT an illegal "regime change." Regardless of Hussein's despotism, the U.S. must follow international law—If we don't, why should anyone else?
- ◆ To **abide by U.N. decisions** as a member of the international community rather than acting alone as a rogue state.

Pass it on:
